PROFILE

Mathematics graduate from Universitas Negeri Jakarta with hands-on experience in statistical data processing, validation, and administrative management at Badan Pusat Statistik (handling 60+ MSMEs and 500+ records). Skilled in Python, SQL, and advanced Microsoft Excel, with a strong foundation in quantitative analysis and reporting. Detail-oriented and methodical, seeking a Research & Data Analytics role to support data management, periodic reporting, and insight generation.

EDUCATION

Universitas Negeri Jakarta

Aug 2022 – Aug 2026

Bachelor's Degree in Mathematics | GPA: 3.42/4.00

- Undergraduate Thesis: Developed a cryptographic mathematical model and structured data analysis framework utilizing Ring-Learning With Errors (RLWE) and Module-Learning With Errors (MLWE) schemes, processing polynomial coefficients up to 256 degrees across 3 distinct datasets using Python for algorithm performance evaluation.
- Relevant coursework: Applied Statistics, Mathematical Statistics, Probability Theory, Numerical Methods, Operations Research, Mathematical Modeling, Data Structures, Algorithms, and Computer Programming.

PROFESSIONAL EXPERIENCE

Badan Pusat Statistik Kota Jakarta Pusat

Jakarta, Indonesia

Statistical Data Entry & Management Intern

Mar 2025 – Jun 2025

- Collected, validated, and processed structured data from 60 local MSMEs across various sectors over a 3-month period, executing comprehensive data cleaning and consistency checks to ensure 100% data accuracy and achieve targets ahead of schedule.
- Analyzed public engagement metrics from 10+ statistical publication and media reports, performing cross-checking validation across variables to identify key audience trends that increased reach and interaction by 20–25%.
- Assisted in updating and maintaining the Public Service Information System (SIPP) database across 500+ administrative records, converting raw field inputs into structured tabulation formats while achieving 100% data accuracy and zero missing entries.

PT Pertamina Geothermal Energy Tbk (PGE) — PT Pertamina (Persero)

Jakarta, Indonesia

Event Operations Support

Aug 2026 – Sep 2026

- Coordinated end-to-end event logistics for 10+ corporate Carbon Disclosure Project (CDP) rating sessions involving 20 key stakeholders per session, ensuring 100% facility and catering readiness.
- Maintained accurate administrative attendance records and digital documentation archives across all sessions, tracking 200+ total participant data points with zero discrepancies.
- Monitored 10+ on-site operational workflows and facility readiness checklists per session, maintaining 100% equipment availability and zero logistical disruptions across all events.
- Validated and cross-checked post-session evaluation data from 200+ corporate participants using Excel, synthesizing feedback metrics to generate actionable operational improvement reports.
- Processed and structured complex stakeholder feedback logs across 10+ sessions, transforming qualitative responses into quantitative analytical summaries for management review.

Potato Bomb — PMW Funded Project

May 2024 – Jan 2025

Business Owner & Operations Analyst

- Conducted comprehensive market research and target audience segmentation to validate business viability, successfully securing funding up to the official PMW funding stage and placing among the top 50 competitive groups.
- Analyzed quantitative sales metrics, operational costs, and financial forecasts using Excel to evaluate growth projections, achieving a 150% return on investment (ROI) and driving a 40% profit margin to build data-driven business strategies.

- Managed sales operations of ~500 packs per month, driving consistent revenue growth and strong customer retention.
- Reduced product waste by 30% within 3 months by conducting systematic stock rotation and inventory tracking analysis, while maintaining 100% compliance with quality and operational standards to ensure seamless daily business execution.

PT Jakarta International Expo (JIExpo)
Operations & Visitor Data Assistant (Jakarta Fair Event)

Jakarta, Indonesia
Jun 2022 – Jul 2022

- Monitored and processed high-volume transactional data ranging from IDR 5–10 million daily during the Jakarta Fair event, maintaining 100% data accuracy across over 500 daily entries and demonstrating strong numerical precision applicable to quantitative data validation.
- Executed meticulous end-of-day cash and digital ledger reconciliations for daily event revenues totaling IDR 5–10 million with 100% accuracy and zero audit discrepancies, showcasing rigorous attention to detail, data hygiene, and reliable auditing methodologies.
- Handled high-throughput logs for thousands of daily event visitors (averaging over 1,500 interactions per shift) under tight time constraints during the Jakarta Fair, translating high-velocity operational environments into structured, organized record-keeping.

ORGANIZATIONAL EXPERIENCE

Badan Eksekutif Mahasiswa Matematika UNJ
Secretary General

Jakarta, Indonesia
Jan 2023 – Jan 2025

- Led the secretariat division and coordinated administrative operations for the student executive board across 2 consecutive terms (24 months total), maintaining planning, reporting, and accountability documentation for 11 organizational programs.
- Facilitated 2 consecutive terms (24 months total) coordination meetings and managed communication channels across divisions to align priorities and track program progress, while spearheading upskilling sessions and onboarding activities for new staff in collaboration with department heads.
- Prepared materials, logistics, and post-event reporting for a national skill development workshop attended by 150+ participants from universities and the general public across Indonesia.

CERTIFICATION & TRAINING

Structured Query Language (SQL) — Talk And Practice (TAP)

September 2025

- Completed an intensive SQL training program covering relational database management, querying, and manipulation techniques to extract, filter, and aggregate relational datasets.
- Participated in hands-on technical sessions focusing on database architecture and data retrieval workflows to support analytical problem-solving.

Excel for Analytics And Optimization — BISA AI Academy

August 2024

- Completed an analytics and optimization training program focusing on advanced data processing, quantitative analysis, and process optimization methodologies utilizing Microsoft Excel tools such as data modeling, pivot tables, statistical formulas, and scenario analysis to streamline workflows and drive data-driven decision-making.

SKILLS & COMPETENCIES

- **Data Analysis & Technical Skills:** SQL, Python (applied via thesis research), advanced Microsoft Excel & Google Sheets (data modeling, pivot tables, statistical formulas, scenario analysis, structured tables, data validation), Tableau, DBeaver, Google Colab.
- **Operations & Administrative Management:** Data processing and validation, high-volume transactional monitoring, ledger reconciliation, inventory tracking, event logistics coordination, document management, and cross-functional coordination.
- **Tools & Software:** Microsoft Office, Google Workspace (Docs, Sheets, Slides, Drive, Forms), Figma, Canva, CapCut, collaboration platforms (Zoom, Google Meet, Teams), Notion, and AI productivity tools (ChatGPT, Gemini AI, Microsoft Copilot, Claude AI, NotebookLM).
- **Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency).
